EdReady: What you need to know

What classes at MSU will EdReady prepare students for?
  • Math placement level 2 (M088, M096, M097)
    OR
  • Math placement level 3 (M121Q, M105Q)
    OR
  • Math placement level 4 (M151Q, M161Q)
    OR
  • Math placement level 5 (M171Q)

Who can use EdReady?
  • Any Montana resident or any current/future student attending an institution of higher education in Montana.

When can students use it?
  • Traditionally, students have used EdReady after HS graduation and before taking the MPLEX at the beginning of MSU’s fall semester.
    BUT
  • It can be used at any point of the year, to prep for any of the classes that are listed above.

Why should they use it?
  • EdReady allows students to be placed into a math class that more accurately represents their skill level and may result in a shorter path to completion.
  • This may allow students to save significant time and money.
    o Upon completion of EdReady, students often test into a math course that is one level higher than they tested into during their initial placement.
  • Students that complete an EdReady course have very high rates of success on the MPLEX and in their subsequent math course.

How do students sign-up?
  • Sign-up by visiting www.tinyurl.com/edreadyform
  • Brett will collect their information and sign them up for an appropriate course. This process may take up to 7 days but is often completed in less time. If you have not received your login after 1 week, please email edready@montana.edu.
