Dedicated teachers, dynamic researchers and faculty devoted to the betterment of Montana were among the winners of the top MSU 2013 faculty awards presented during MSU Spring Convocation Thursday in the Procrastinator Theater. The annual awards honor achievement in faculty research, teaching, outreach and creative projects. Read more.

MSU honors top faculty and staff
January 03, 2013 – MSU News Service

Brock LaMoree, electrical and computer engineering, won a Teaching Innovation Award for innovations including the development of a remote laboratory system that allows students to control laboratory equipment on campus from any computer, enabling them to complete the laboratory component of a course without having to come to campus. He is also the primary adviser of MSU’s NASA Lunabotics team that won NASA’s systems engineering paper category in 2012 and won the national championship for mining in 2010. Photo by Kelly Cortman.
