HOW WE CAN HELP YOU

ENGINEER

- > Traditional consulting role for a specific, defined scope of work

OWNER'S ENGINEER

- > Acts on owner's behalf to oversee a project to completion

ALLIANCE PARTNER

- > A long-term agreement for general engineering services to supplement an owner's engineering staff

DESIGN-BUILD

- > As either prime or subcontractor, shares responsibility for a project with a construction contractor

YOUR SUCCESS – TO US, IT'S PERSONAL

How did a three-person firm in Idaho become a nationally ranked consulting engineering firm with offices across the country and overseas? Our clients describe the answer in three simple words: **flexible, knowledgeable, reliable.**

Flexible

We approach each project knowing that there are many ways to solve a problem. Our project management system offers structure and discipline but also the flexibility to accommodate each project's specific needs. We have a collaborative working style with our clients; an approach that results in client satisfaction.

When you're talking with us about a potential project, you're talking with the person who will actually manage that job.

Knowledgeable

POWER is recognized as a leader in the engineering industry. We are at our best when we are solving our client's challenges through resourcefulness, perseverance and innovation. Our clients reward us with a high rate of repeat business.

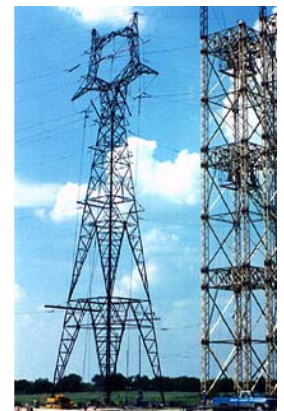

Our employees bring a high level of personal engagement to our projects. At POWER, it's all about the client – not just "the job."

Reliable

We have a proven track record of delivering what we say we will, thanks to dedicated project managers and highly-skilled engineers. With our characteristic teamwork, we roll up our sleeves and get to work, searching out the best solution for each design challenge.

We know we don't succeed unless our clients succeed. And we do everything we can to make sure they do.

POWER provides diverse services for projects in energy, facilities and communications.

POWER Engineers, Inc.

Positioned to Serve You

In the field or in the office, we assemble customized teams to serve our clients. Through state-of-the-art technology and strong working relationships, we build the right team to fit the project.
