Faculty Position in the Department of Cell Biology & Neuroscience.

The Department of Cell Biology & Neuroscience at Montana State University (MSU) invites applications for an open rank tenure track faculty position. We are seeking established neuroscientists who use innovative approaches to study the nervous system. Successful candidates will have a vigorous, externally-funded (e.g. NIH, NSF) research program with international recognition for excellence, a strong track record of leadership and collaboration, and will be expected to teach at both the undergraduate and graduate level. Salary is completely supported for the 9 month academic year and grant funding can be used to supplement both the academic year and summer salary. New initiatives at MSU include the Center for Mental Health Research and Recovery whose goal is to develop new technologies for the diagnosis and treatment of serious mental illness and an NSF ADVANCE Institutional Transformation Award. Interested applicants may apply directly at [https://jobs.montana.edu/postings/654](https://jobs.montana.edu/postings/654). The review of applications will begin on 12/1/2014 and will continue until the position is filled.

Living in Bozeman

- Great skiing minutes from downtown.
- A short drive from Yellowstone National Park.
- Many outdoor activities
- World class fly fishing

The MSU Community

- Cell Biology & Neuroscience
- Chemistry & Biochemistry
- Physics
- Microbiology and Immunology

Neuroscience is Growing in Montana!
