

Cell Biology and Neuroscience Seminar Series

Friday, November 21st

3:10 pm, 108 Plant BioSciences Building

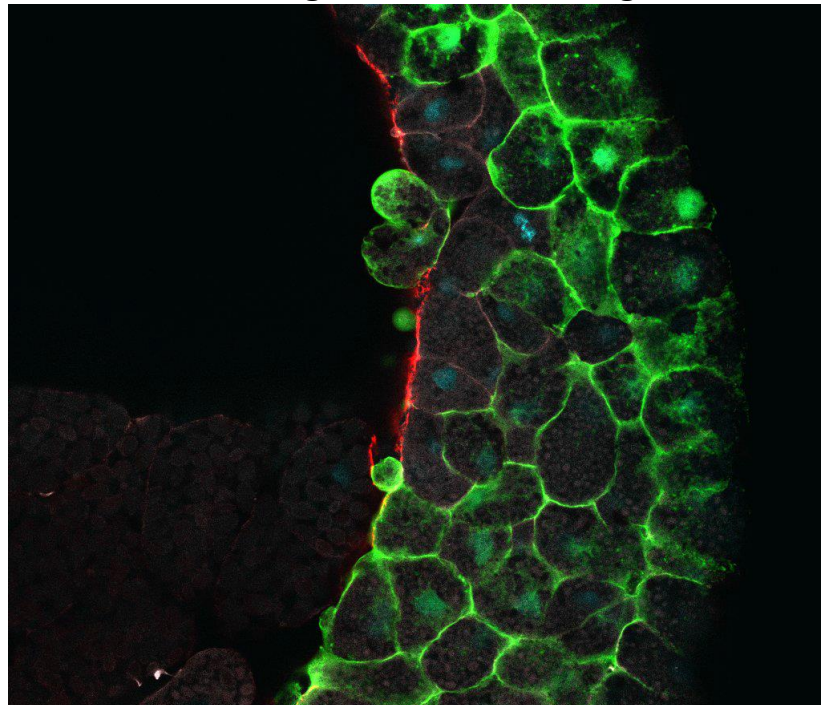

Dr. Christa Merzdorf
Associate Professor

Department of Cell Biology & Neuroscience
Montana State University

The Many Hats of Zic1 In Embryo Development

The Merzdorf lab will discuss how the *zic1* gene led to studies of an Aquaporin during gastrulation and neural tube closure and to examining the role of *ZIC1* during cranial suture development.

Upcoming Seminars: (1) Friday, Dec. 5: Matt Taylor, Dept. of Microbiology & Immunology, MSU; and (2) Friday, Dec. 12: Charles Gray, Dept. of Cell Biology & Neuroscience, MSU.

All are welcome. Refreshments will be served.
