

Friday, October 31st

3:10-5 pm, 108 Plant BioSciences Building

Lefcort Lab

Department of Cell Biology and
Neuroscience
Montana State University

**Development and disease of the peripheral
nervous system**

The Lefcort Lab will discuss their work on normal development of the peripheral nervous system and how that led to their work on generating a mouse model for the human peripheral neuropathy, Familial Dysautonomia.

Upcoming Seminars:

Friday, November 7

Deborah Levy, Department of Psychiatry, Harvard Medical School

Friday, November 21

Christa Merzdorf, Department of Cell Biology and Neuroscience, Montana State University

Friday, December 5

Matt Taylor, Department of Microbiology and Immunology, Montana State University

Friday, December 12

Charles Gray, Department of Cell Biology and Neuroscience, Montana State University
