

## Mid-Project Reports

**Due December 1 and April 1**

Each report should not exceed 5 pages and should include a brief description of:

1. Progress toward the aims of the study.
2. Problems encountered.
3. Any changes or assistance needed to keep the project progressing according to the timeline.

It is assumed that the Principal Investigator is attending the PI meetings and discussing the ebb and flow of his/her project and that if major problems have been encountered they have been brought to the attention of the CRCHC Director.
