

CONSTRUCTION PROJECT NOTIFICATION

Project Name: Parking Structure PPA No.: 14-0046
To: Campus Community Date: September 28, 2015
From: Sam J. Des Jardins - Project Manager MSU Campus Planning, Design & Construction

Construction operations for MSU's new parking structure will begin in October, and installation of the construction fence will start Sunday, Oct. 4. The construction will from time to time generate standard construction disturbances such as dust, drilling, power outages, etc. MSU's Campus Planning, Design and Construction will work to keep the campus community informed of all construction updates.

Once the construction fence is in place, the North Gatton parking lot will only have the pay lot, handicapped and R5 reserve parking available (*see the attached site plan detailing the construction fence location*). **No SB parking will be available in the North Gatton lot after the Sunday, Oct. 4.** South 7th Avenue, the South Gatton lot and the Huffman lot will continue to have SB parking. In addition, the Stadium East lot on the east side of the stadium will be open for daily parking. E, F and SB permits are all valid for parking in the Stadium East lot. Facilities Services is planning on installing a pedestrian gate in the northeast corner of the Stadium East lot to allow parkers direct access to the pedestrian crossing at South 7th and Kagy.

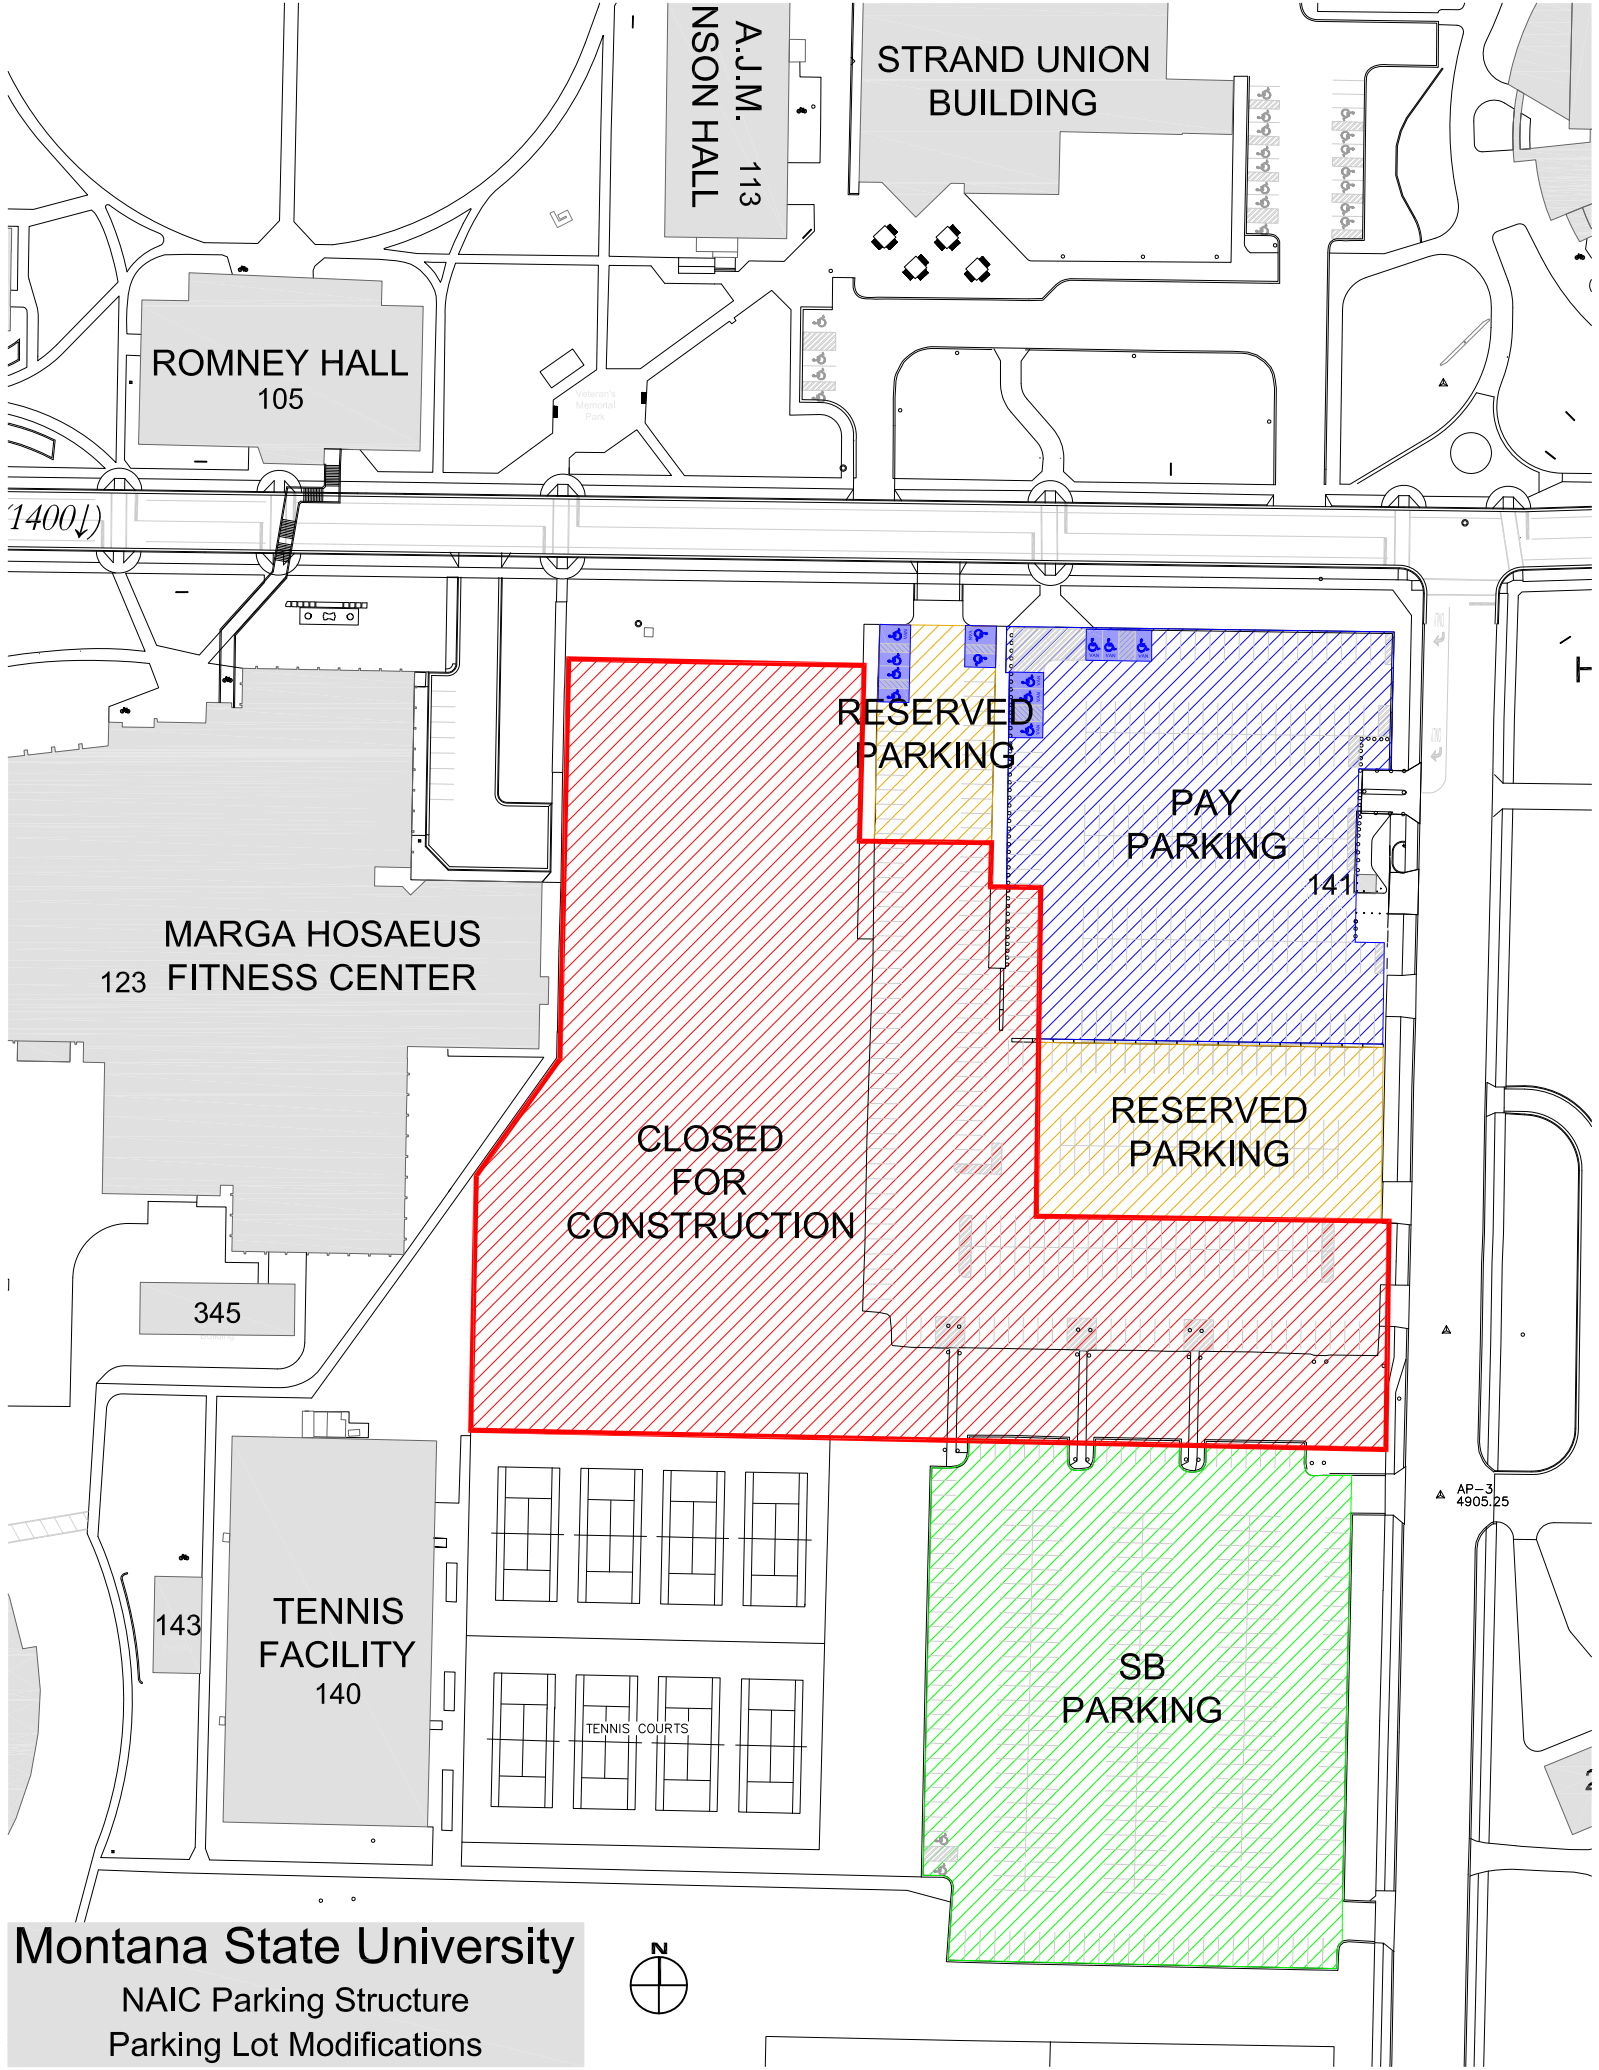

Please note that commuters parked in the stadium lots will need to vacate the stadium lots by 6 p.m. on the Friday before home football games to allow for game day parking and tailgating.

We appreciate your assistance and patience throughout the project. Construction-related questions and comments may be directed to MSU Campus Planning, Design & Construction at 994-5040 or pdcc@montana.edu. For parking-related questions, please contact MSU Parking Services at 994-1723.

Thank you

Sam J. Des Jardins, Project Manager
