

ENGR 310
Assignment 8: Design Fair

Your team is required to present a poster and model at the Design Fair to be held 12:00 – 6:00 p.m., May 1, in SUB Ballroom A. Details:

- A 2' x 6' table will be provided. Please let Dr. Sobek at least a week ahead of time know if you need electrical power, as we'll try to make power available using the minimum number of extension cords. Also let Dr. Sobek know if you have any other requirements.
- You will purchase the materials for your own poster. Please follow a good design process in the design and construction of your poster. Poster should convey the problem, the process, and recommended solution.
- Your poster will be evaluated by a team of experts for content (see previous point) and conformance to the poster design principles presented in class.
- You will also present a model of your design (or critical aspect of it) appropriate to a non-technical audience. The model should have served a purpose (such as proof-of-concept) in your design process.
- The room will open at 7:00 a.m. for set-up.
- At least one team member must be at the poster throughout the 6-hour time period.
- All team members must be present *together* at the poster for at least one hour for instructor evaluation. You will be asked to communicate this to Dr. Sobek.

More details may be forthcoming.
