By entering the EAL (Leon Johnson 823, 824, 828)
you are agreeing to the following rules:

- All equipment and consumables in the EAL are for EAL use. If you need supplies for your own research, you need to purchase them. This includes, but is not restricted to, sharpies, lab tape, paper towels, gloves, and sampling containers. If you need to ‘borrow’ anything, make sure you notify Christine before borrowing and replace/return as soon as possible.

- Always leave the EAL cleaner than you found it. If you spill on the floor, clean it up (use a broom for solid spills, use paper towels/rags for liquid spills). If you spill on the counter, clean it up. Even if you don’t think you spilled, it is good practice to sweep and wipe down the space you used while in lab. If your spill is potentially hazardous, find out how to clean up BEFORE you start working. If you don’t know where the cleaning supplies are kept, ask Christine.

- If you use glassware/plasticware while working in the EAL, clean and leave it drying on the rack above the black sink. Remove all dry glassware/plasticware and put it away before you start cleaning your own. The next person will put away your items before they start working. NO items should be left in/on the stainless steel sink or on the lab counters.

- Remember this is a shared facility, items left on counters/shelves could be moved, damaged, contaminated at any time. If you want to leave non-EAL items (e.g., your samples) in the EAL while you are away, check with Christine to find the best option.

- Nothing that is radio-labelled or used in a radio-labelled experiment should be brought into the EAL without explicit permission from Christine Gobrogge.

Christine Gobrogge is typically here M-F 8:00am-3:00pm.

Please email christine.gobrogge@montana.edu
or phone: (office) 406-994-5703 (cell): 989-295-5487
to verify Christine’s schedule.
