**GRA Positions—MSU Library**

The MSU Library is hiring two GRAs during the Fall 2019 semester to teach R workshops in the library. These workshops include Introduction to R, Intermediate R, Data Wrangling in R, and Data Visualization in R. Each 3-hour workshop is offered once during the semester, building on the content covered in previous workshops.

The GRAs will be trained and mentored by Allison Theobold (PhD Candidate in Statistics), and supervised by Sara Mannheimer (Assistant Professor in the Library). We will begin meeting the first week of the Fall semester (August 26, 2019) and continue to meet 1 hour per week during all non-workshop weeks to review workshop materials and practice teaching. The remaining hours are flexible for reading, reflecting, and practicing teaching. Ideally, these GRAs would be available to teach workshops in Spring 2019 as well, although funding is still pending for the Spring semester.

The application process can be completed using the following form:
