

Undergraduate Research Opportunity in Plant and Pollination Ecology – Summer 2023

Job description

I am seeking an undergraduate research technician to assist in monitoring restorations by the BLM and Forest Service to assess their effects on native pollinator and plant diversity and interactions.

This position will involve fieldwork including the collection and observation of pollinators, the identification of native plants, and lab work involving data entry and specimen preparation.

Requirements

- Ability to work with stinging insects
- Ability to travel to Glasgow and Hamilton, MT throughout the summer, and a valid driver's license (vehicle will be provided)
- Willingness to work and camp in remote locations for extended periods of time

Preferred Qualifications

- Junior or Senior status at MSU
- Prior coursework or experience in native plant identification

Expected Start/End Date

- Mid/Late May to Mid-August

To Apply

Contact Malia Naumchik at mmalia12@gmail.com with a brief statement of interest and description of any prior relevant coursework or research experience
