

Collaboration for Effective Educator Development, Accountability, and Reform Center Montana State University – Bozeman Dr. Jayne Downey

Montana CEEDAR Vision

All students will maximize their post-secondary attainment and find meaningful places in their communities.

Montana CEEDAR Mission

We will increase the commitment and capacity of all Montana educators to maximize the learning outcomes of every student.

Goal 1: Increase the commitment and capacity of all Montana educators to address the academic, behavioral, and socio-emotional development of all learners through the application of evidence-based instruction and practices.

Goal 2: Develop an aligned PK-20 system that addresses, in a timely fashion, Montana’s education priorities as determined by data trends, issues, and research.

Goal 3: Implement appropriate program-level strategies to increase the use of evidence-based instructional practices for students with disabilities (SWDs) in educator preparation programs (general education, special education, and leadership) and in-service professional development opportunities.
