Connecting the Dots with Integrative Learning: Mapping the Terrain

Friday, January 30, 12:00 p.m.-1:00 p.m., Plant Sciences 108

Presenters: Jill Davis, English; Wendy Morrison, EHHD and Anton Bekkerman AG Economics

Join us for faculty sharing exciting projects in their classes that integrated teaching, discovery, and outreach. When faculty offer integrative learning experiences they enhance student ability to weave together various classroom scholarship and real world learning experiences. These projects were created out of a 2014 CFE faculty learning community on integrative practices. Come to learn and to see if you might be interested in joining a faculty learning community this semester to design a project for your own class.
