

Level II Board of Regents
Curriculum Proposal
Department of Health & Human
Development
Montana State University
Bozeman, MT

Facilitated by:

Dr. Tim Dunnagan, HHD Department Head
Dr. Lynn M. Owens, HHD Curriculum Coordinator

November 15, 2007

Health & Human Development Mission Statement

To enhance human well-being through
teaching, research, and outreach

Overview

- Revise and Restructure academic programs
- 2 year process
- Faculty
- Students
- National Trends

Need

- To update names of programs and program offerings so that better alignment exists between current trends, themes and issues related to all HHD curricula leading to the enrichment of human well-being.
- To make the various program offerings more visible to perspective students, thereby increasing our recruitment rates.

Current Degrees/Major/Options

- B.S. in Health & Human Development
 - Community Health
 - Exercise Science
 - Pre-Physical Therapy
 - Health Enhancement
 - Food and Dietetics
 - Family and Consumer Science

B.S. in Health Promotion

Proposed Majors/Degrees/Options

- B.S. in Community Health
- B.S. in Early Childhood Education/Child Services
- B.S. in Family and Consumer Sciences
 - Teaching Option
 - Non-teaching Option
- B.S. in Food and Nutrition
 - Dietetics Option
 - Nutrition Science Option
 - Sustainable Food Systems Option
- B.S. in Health and Human Performance
 - Exercise Science Option
 - Kinesiology Option
- B.S. in Health Enhancement K-12

Institutional and System Fit

Promoting Strategic Goals of University

These proposed changes will enable HHD faculty to increase their recruitment of students and contribute to the university goal of “recruiting 13,000 students.”

Institutional and System Fit

Promoting Strategic Goals of University

Faculty in the Early Childhood area have been very successful in recruiting Native American students.

By moving this focus from a program level to a departmental major we will enhance this effort and better contribute to the university goal of “generating a more diverse student body.”

Institutional and System Fit

Promoting Strategic Goals of University

The Sustainable Food Systems option is an interdisciplinary venture between HHD and the College of Agriculture.

This effort contributes to the curriculum goal for academic offerings

“to be increasingly interdisciplinary.”

Program Details

- Catalog descriptions
- Tab sheets

Resources

- No additional resources required
- Zero sum gain

Assessment

- Number of Students Majors
- Student Credit Hour Production
- Tracking Graduates
 - Employment Rates
 - Mean and Median Salaries
 - Acceptance to Graduate Programs

Process Leading to Submission

- Initiated by the faculty and EHHD administration
- Need to update the HHD curriculum
- Need to provide additional visibility, focus, and clarity for potential students.
- One year was spent by the faculty and HHD Department Chair discussing the merits of changing program names, splitting programs into separate majors and consolidating programs.
- Discussions were conducted with area program leaders and faculty who support the various areas.

- Departmental curriculum coordinator facilitated the major and option offerings in relation to the needs of the entire department.
- This effort led to the catalog descriptions and tab sheets for each major and option (6 months).
- The entire effort enabled the faculty and administration to restructure the curriculum and course offerings.
- The final product resulted in revised majors and options, course additions and deletions
- The total number of credits offered within the department remained the same between the 2006-2008 catalog and the 2008-2010 catalog.
