Module 1 – Upgrade Overview

What we will Cover:

• What is Banner 9?
• Key Value Drivers
• Design Principles and Benefits
• Benefits of Banner 9
• The Journey to Banner 9
A Modern Connected Institution

Ellucian’s strategic direction with Banner 9 is to provide the Software and Services needed for a Modern Connected Institution. Banner 9 is a cloud-enabled, integrated, mobile solution designed to enhance every aspect of higher education.
The Four Key Value Drivers

There are four strategic customer needs, which Ellucian calls “Key Value Drivers” which form the foundation of Banner 9: Student Success, Constituent Experience, Institutional Growth, and Operational Efficiency. Every aspect of Banner 9 has been designed to help institutions meet these four strategic needs.
Banner 9 Design Principles
Based on the four key value drivers of Student Success, Constituent Experience, Institutional Growth, and Operational Efficiency; Banner 9’s design features include:

- A contemporary and modern User Experience (UX)
- New features and functions – especially in Self Service applications
- New Configuration and Extensibility Tools which reduce need for customization, local code, and need to reapply modifications after each Banner 9 upgrade
- Underlying technology is cloud-ready, offering freedom of choice as to where Banner is hosted.
- Enhanced integration capability
**Banner 9 Consistent Look and Feel**

Banner 9 has a consistent look and feel across all desktop and mobile devices.
Banner 9 Self-Service Applications

As of today, there are 18 new Banner 9 Self Service Applications. While the remaining Banner 9 Self Service Applications continue to be developed, Banner 8 Self Service Applications can coexist with the Banner 9 applications and Banner 9 Administrative Pages.
The Journey to Banner 9

Unlike most Banner upgrades of the past, the upgrade to Banner 9 can be phased.

Banner 8 INB Forms Become Banner 9 Admin Pages

The transition to Banner 9 Administrative Pages can be made gradually. Moreover, Banner 8 INB forms can continue to be used side by side with Banner 9 Admin Pages for as long as the institution’s policy shall dictate. However, as of December 2018, Ellucian will no longer release upgrades or defect corrections for Banner 8 INB forms. We recommend that our clients discontinue using Banner 8 INB forms prior to the December 2018 sunset date.

Banner 8 and Banner 9 Self Service Applications

Sunset dates for Banner 8 Self Service Applications have not yet been set. Ellucian will support Banner 8 Self Service Applications for the foreseeable future. Banner 9 Administrative Pages can be used together with any combination of Banner 8 and Banner 9 Self Service Products.
Application Navigator is the New Interface to Banner 9
Later in the course we will explore Application Navigator which is the new interface for Banner 9
**Banner 9 Administrative Pages**

There is a 1:1 conversion from Banner 8 Forms to Banner 9 Admin Pages.
