

Montana LTAP Presents: 2016 MACRS Fall District Meetings Trenching Safety & Load Securement

Local Technical Assistance Program

Workshop Objective: Participants will learn safety aspects of trenching, culvert installation, and load securement.

Workshop Description: This course will cover safety aspects when trenching to protect workers in trenches through sloping & benching and shoring & shielding, use of trench boxes, ladders and Top Person, PPE; understanding soil saturation, cohesion, how to test soils, being aware of hazardous atmospheres; culvert installation. Also included in this workshop is Load Securement safety and importance of load location, securing the load with tie-down assemblies, and load limits.

Who Should Attend: Anyone who operates or is involved with trenching activities, such as culvert placement and hauling heavy equipment.

Instructors: Jim Matosich, Earth Movers Training Company, has operated and provided heavy equipment safety training for over 20 years. His background includes safety equipment training for Alaskan mining companies, Idaho city and county road departments in excavation, trenching and shoring safety; Idaho Transportation Department training on loading and unloading heavy equipment for transport. TrueNorth Steel will provide trainers at each site for culvert installation presentation.

Questions: MT LTAP Conference Coordinator Genevieve Houska at 1-800-541-6671
