

Laser-Ablation Inductively Coupled Plasma Mass Spectrometry Technology Access Grants

The Montana State Mass Spectrometry facility is seeking applications for technology access grants for LA-ICP mass spectrometry. Technology access grants enable investigators to produce preliminary data or proof-of-concept data needed for competitive external proposals or publications. The amount of each award will depend on resources to be used, but will typically range from \$1,000 to \$3,000. Proposals will be reviewed on a rolling basis beginning March 20, 2023. Proposal deadline is April 21, 2023. Proposals should be no longer than 2 pages, and include an introduction with background, proposed experimental plan, and short budget justification. Please contact Dr. Don Smith, Donald.smith8@montana.edu, for more information and project budgeting and planning assistance. Funds made possible by the by the MJ Murdock Charitable Trust.
