Committee Chair Signature approving coursework on this page:

***The minimum credit requirement for an advanced degree at MSU varies from thirty (3) credits upward, depending on the degree program.

To reduce the number of changes to the program of study, the Division of Graduate Education recommends including only the minimum number of coursework and 590/690 credits (If applicable) needed to fulfill degree requirements. This may save the student, dept, and CGS time in recording program changes and reduces the possibility of course, grade, and program problems for the student and advisor.
