Denise Sekaquaptewa is Professor of Psychology, and Faculty Associate at the Research Center for Group Dynamics, at the University of Michigan, Ann Arbor. Dr. Sekaquaptewa received her undergraduate degree in psychology from Arizona State University, and her master's and doctoral degrees from the Ohio State University. Her research in experimental social psychology focuses on stereotyping and intergroup dynamics, in particular how being in the numerical minority in terms of gender or race influences academic outcomes and experiences. The consequences of unintended stereotyping for intergroup behavior and individual performance in stereotyped domains are also a focus of her work. Her research on gender stereotypes about women in science and engineering is funded by the National Science Foundation. She previously served an Associate Editor for the journal Cultural Diversity and Ethnic Minority Psychology, and is currently an Associate Editor for Personality and Social Psychology Bulletin. personal page

Noel Perkins is the Donald T. Greenwood Collegiate Professor of Engineering and an Arthur F. Thurnau Professor in Mechanical Engineering. His research interests include computational and nonlinear dynamics, MEMS inertial sensor applications for human motion, and the mechanics of single molecule DNA. He earned his PhD at U. C. Berkeley in 1986 (Mechanical Engineering) and joined Michigan faculty in 1987. He serves as the Editor of the ASME J. Vibration and Acoustics and has previously served in editorial capacities for five other journals. He is a Fellow of the American Society of Mechanical Engineers, and a recipient of the General Motors Outstanding Distance Learning Faculty Award, the Academic Challenge Award from the Technical University of Munich, and a number of teaching awards from the University of Michigan. He remains active in commercialization activities for MEMS-based sports training systems, and is founding partner of Cast Analysis, LLC that manufactures a fly casting training system for the fly fishing industry. personal page
