Introduction

Welcome to Montana State University College of Nursing Family Psychiatric Mental Health Nurse Practitioner graduate option. This manual will serve as a guide to the FPMHNP graduate student to achieve a successful clinical experience. Within this manual are sections that will assist students in identifying their responsibilities for:

- Clinical preparation and placement
- Scheduling clinical hours
- Establishing clinical objectives
- Proper documentation

Goals of the Clinical Experience

1. Expand student's exposure to clinical situations, strategies and variety of treatment modalities.
2. Provide the opportunity to apply theory.
3. Work with and learn from an experienced clinician as a preceptor.
4. Develop and expand expertise in clinical skills.
5. Expand knowledge about the operation of clinical sites.
6. Develop knowledge of the financial aspects of mental health care practice.
7. Expand experience in the care of families in mental health care.
8. Provide opportunities for collaboration with other disciplines in the provisions of health care services.

Appropriate Clinical Sites

To prepare for the best clinical experiences, students are strongly encouraged to complete a clinical plan. (sample, page 10)

To facilitate the clinical placement and paperwork process, a current short form vitae or resume is required from each preceptor. Information on preceptors is updated yearly. The form is located online at: <http://www.montana.edu/wwwnu/student/graduate.php>

Clinical placements must be completed prior to the start of the semester. **Please limit preceptors to 1 or 2 per semester.**

Clinical Courses

NRSG 525 Family Mental Health Nursing I

The first clinical course begins in Spring semester and requires 135 hours of clinical with a preceptor. In this course, students will explore the role and scope of advanced psychiatric nursing practice, the foundational legal/ethical issues, and the nurse practitioner/patient

relationship. Emphasis will be placed on advanced mental health nursing assessment and diagnosis for health promotion and managing mental health problems and psychiatric disorders for individuals and families across the lifespan within culturally diverse environments.

NRSG 526 Family Mental Health Nursing II

The second clinical course is offered Summer semester and requires 135 hours of clinical with a preceptor. In this course students will explore the conceptual and theoretical foundations for psychotherapy, including selected therapeutic modalities for individuals, group psychotherapy, and the integration of multicultural skills for health promotion and management of mental health problems and psychiatric disorders. Emphasis will be placed on working with individuals and groups across the lifespan within culturally diverse environments.

NRSG 527 Family Mental Health Nursing III

The third clinical course is offered Fall semester and requires 135 hours of clinical with a preceptor. In this course, students will explore the conceptual and theoretical foundations for providing psychotherapy with families and promoting health. Students will work with persons with mental health problems or psychiatric disorders who have acute and/or chronic mental health needs. Emphasis will be placed on working with families across the lifespan within culturally diverse environments.

NRSG 528 Family Mental Health Nursing Theory and Clinical IV

The final clinical course is offered the last Spring semester of coursework and requires 225 hours of clinical with a preceptor. This course provides the conceptual and theoretical foundations for working with individuals and families with mental health problems or psychiatric disorders. Interventions will include health promotion, the coordination and use of organizational or community resources, consultation, teaching/coaching, and the application of nursing leadership skills. Emphasis will be placed on working with individuals and families across the lifespan within culturally diverse environments.

Who Can Act as a Preceptor?

Psychiatric Mental Health Nurse Practitioners—Psychiatric Clinical Nurse Specialists

- Actively involved in clinical practice
- Nationally certified as an NP or CNS in mental health
- Hold master's degree with at least 1 year of clinical experience.
- Recognized as an APRN in Montana with prescriptive authority or recognized as APRN meeting federal guidelines. [Federal facility requirements as VA clinics, military, US Public Health Service Corps (USPHSC), etc]

Psychiatrists

- Actively involved in clinical practice.
- Board certified preferred
- Licensed in Montana as MD, DO or recognized as MD/DO meeting federal guidelines.

Psychologists and Licensed Mental Health Counselors

Discuss placements individually with clinical faculty and FPMHNP Clinical Coordinator. They must be actively involved in clinical practice and licensed in Montana.

Areas of Practice

- Clinical practice settings
- Crisis intervention & emergency services
- Acute in-patient
- Intermediate & long-term care
- Partial hospitalization & intensive outpatient care
- Residential care
- Community-based care
- Assertive Community Treatment
- Primary Care
- Integrative Programs
- Tele-health
- Self Employment
- Forensic Mental Health
- Disaster Mental Health

Preceptor Interview

Some preceptors request an interview with the student. The interview:

1. provides the preceptor with an understanding of the level, ability, and personality of the student; and
2. enables the preceptor to assess if the student would be a “good fit” for the clinical site and the population it serves. Remember you are a guest in the clinical practice. The preceptor has the right to make a decision about whether you are a good match for that particular practice.

Scheduling of Clinical Hours

Clinical practicum hours are to be scheduled at the convenience and availability of the preceptor.

- Students are not to ask preceptors to conform to a schedule that meets their personal and employment needs.
- The student’s personal and work schedules are expected to accommodate the required number of clinical hours prescribed by the clinical course.

- Prior to beginning the practicum experience, students and preceptors need to agree on the days and times that the student will be in the clinical agency.
- Each Primary Care course requires 8 clinical hours per week *except* NRS 528, which requires 225 total clinical hours over 15 weeks or 15 hours per week.

Attendance

- It is the student's responsibility to monitor the number of clinical hours.
- Extension of the clinical experience with the preceptor cannot be assumed. Unexpected illness of the student, family and/or preceptor should be discussed with clinical faculty and the parties involved.
- Failure to notify the preceptor as negotiated is unacceptable and may place the student and clinical placement in jeopardy.
- Absences resulting in lost clinical hours must be completed before the end of the semester and at the convenience of the preceptor.

Professional Dress and Behavior

- Students present themselves as ambassadors of the College of Nursing and the graduate program. Students are expected to be respectful to preceptors, faculty, staff, patients and their families.
- Reports of unprofessional behavior will result in the student being counseled and is subject to review by the College of Nursing Associate Dean for Research and Graduate Education. Refer to College of Nursing (CON) Policy D-3 [Clinical Performance in Required Graduate Clinical Nursing Courses](#). Students should be professionally dressed (clinical site-specific attire) and wear a student nametag that meets State Board of Nursing requirements.
- Each student is required to send his or her preceptor/s a thank you note using CON letterhead (letterhead can be obtained from your campus administrative assistant). A copy of the letter must be given to the clinical faculty and will be included with the final course evaluation.

Clinical Placement

Preparation

1. Students are expected to have full knowledge of agency requirements for the clinical practicum (orientation, dress, location, schedule, etc.) before scheduling the first clinical day.
2. On the first clinical day discuss questions about orientation, computer access, the procedure for co-signing documents, communication with other disciplines, eating, parking arrangements, etc.
3. Learn something about the preceptor, when possible, in order to acknowledge the preceptor's background and broaden the student's educational experience.

Placement Process

1. Meet with your assigned clinical faculty early in the semester before taking the course. Review your goals, strengths and weaknesses. Discuss your ideas for clinical sites and potential preceptors. If needed, meet with your clinical faculty again for assistance.
2. Contact the potential preceptor by phone or letter of introduction. You will need to know:
 - a. when the course begins and ends
 - b. how many clinical hours you will be spending with the preceptor
 - c. days/hours that you are NOT available (e.g., class days, holidays, work)
3. When you have received verbal confirmation from a preceptor, obtain the preceptor's vita or resume and send to the FPMHNP Clinical Coordinator, Kelli Begley, MSN, APRN, by email (kelli.begley@montana.edu) or fax (406 657-1715).
4. The preceptor packet will be prepared by Patty Lucas, Administrative Associate on the Billings Campus (phughs@montana.edu, phone: 406 657-1729 or FAX 406-657-1715). Ms. Lucas will send the preceptor packet directly to the student. The preceptor packet contains an introductory preceptor letter, agency agreement (when applicable), course description/objectives and student evaluation form.
5. The student is responsible to see that the preceptor packet is delivered and the agency agreement is signed and returned to the FPMHNP Coordinator (address to: Kelli Begley, MSN, APRN, MSU College of Nursing, PO Box 574, Billings, MT 59101) before beginning the clinical experience.
 - No student will be allowed to attend clinical until the Agency Agreement/ Contract and preceptor vita have been returned to the FPMHNP Clinical Coordinator (Kelli Begley).
 - Students without a preceptor in place the first week of classes for clinical courses NRS 525, 526, 527, and 528 will be asked to withdraw from the course.
 - The College of Nursing has existing, ongoing contracts with most major hospitals and large clinical organizations such as Community Medical Center, Billings Clinic and VA. Check with FPMHNP Clinical Coordinator or Patti Lucas to see if a contract is already in place.
6. Students will not be allowed to attend clinical without a current compliance card from the Associate Dean for Research and Graduate Education. This card should be with the student at all times during clinical. The card expires on the earliest expiration date of the following:
 - PPD
 - Professional CPR certification
 - Standard Precautions
 - HIPAA review form

Documentation

Clinical Hours

Documentation of clinical hours is required for:

1. Satisfactory completion of each clinical course
2. Certification as an advanced practice nurse
3. Preceptor recertification

It is the student's responsibility to maintain documentation of clinical hours and to obtain the preceptors signature at the appropriate time.

Preceptor Evaluation of the Student

The preceptor provides the student with two types of evaluation: formative and summative.

1. **Formative evaluation** is the ongoing evaluation provided over the course of the semester. Formative evaluation is valuable to students because feedback can build the student's confidence, as well as identify areas needing improvement.
2. **Summative evaluation** is the final evaluation of the student's performance at the end of clinical practicum. The preceptor will document the summative evaluation on the form provided in the preceptor packet. It is important for students to review the evaluation form and the Clinical Performance Criteria at the beginning of each semester (see <http://www.montana.edu/wwwnu/student/graduate.php> for evaluation forms. Course and individual student learning objectives should be reviewed at this time, providing the student and preceptor with an opportunity to discuss expectations and responsibilities.

Purposes of Preceptor Feedback/Evaluation

- To improve and enhance performance.
- To enable the student to successfully course objectives successfully.
- To mentor the student in role and professional development.
- To provide ongoing and final evaluation.
- To assist clinical faculty in evaluation of student performance.

Student Evaluation of the Preceptor

For College of Nursing accreditation and credentialing, students are required to evaluate preceptors. Evaluations are completed at the end of the clinical practicum and returned to the clinical faculty.

Graduate Program Forms

See <http://www.montana.edu/wwwnu/student/graduate.php> for various graduate program forms including evaluations. A copy of the Graduate Clinical Hours Record (page 11) and the Clinical Faculty Reference Guide (page 12) is included in this manual for your reference.

Montana Area Health Education Centers

Montana State University was awarded a grant from the Health Resource Service Administration to establish a statewide system of regional Area Health Education Centers (AHEC). The Program Office is located on the Montana State University Campus, directed by Kristin Juliar. The purpose of the regional centers is to connect health professions education to rural and underserved communities. Programs developed at the center focus on creating a link between health professions students (such as WWAMI and nurse practitioner students) and clinical rotations in rural communities. For more information contact Kristin Juliar, (406)-994-6001, kjuliar@montana.edu or go to: <http://healthinfo.montana.edu/ahec.html>.

Looking for a Clinical Site? Go Rural

Rural health clinics, public health department clinics, critical access hospitals or hospital-affiliated primary care practices, managed care networks, prisons, U.S. Immigration, Customs & Enforcement, and Indian Health Clinics provide rich clinical experiences. Most of these sites are defined as Health Professional Shortage Areas and some offer housing for students traveling to clinical. Students are often employed in these areas after graduation and are eligible for loan repayment. For more information on the loan repayment plan go to: <http://nhsc.bhpr.hrsa.gov/loanrepayment/>

Certification Examinations

Certification is available for family psychiatric mental health nurse practitioner graduates through American Nurses Credentialing Center (ANCC). Nurses who pass the ANCC certification are recognized for licensure by the Montana Board of Nursing. The exam is computerized and upon completion will give the candidate a “pass/fail” result. To save time in the application process, students should request that official transcripts be sent directly from the university to ANCC. Students can submit an official transcript with work to date if applying before the end of the semester of program completion. Automatic notification of local state board of nursing can be requested for eligibility to take the examination and for passing the examination.

Basic eligibility requirements

1. Hold a current, active, unrestricted professional RN license in the United States or its territories.
2. Hold a master's or higher degree in nursing.
3. Have successfully completed formal education and training in the same role and specialty area of practice in which you are applying for certification through either a master's program or a formal post-graduate master's certificate program in nursing.
4. Have graduated from a program offered by an accredited institution granting graduate-level academic credit for all course work that includes both didactic and clinical components and a minimum of **500 hours** of supervised clinical practice in the specialty area and role and includes core content in:
 - a. advanced health assessment
 - b. pharmacology
 - c. pathophysiology
 - d. health promotion and disease prevention, and
 - e. differential diagnosis and disease management.
5. Show proof of diagnosis and medication management of psychiatric illness.
6. Received supervised clinical training at the graduate or post graduate level in at least two of the following modalities:
 - a. Individual
 - b. Family
 - c. Milieu
 - d. Group
 - e. Expressive therapies
 - f. Play therapy
 - g. Other psychotherapeutic treatment modality

ANCC Certification

ANCC is the largest nursing credentialing organization in the United States. Computer-based exams are available year-round at more than 300 test sites. Testing sites in Montana include Billings and Helena. ANCC certification examinations are also fully accredited by NCCA, the National Commission for Certifying Agencies and are recognized by the National Council of State Boards of Nursing. The Family Psychiatric Mental Health Nurse Practitioner Clinical Coordinator must complete an education validation form to be included with your application. It often takes up to 8 weeks to receive your admission ticket to take the examination. The website has study guides, sample questions, and an outline of the examination. Credential awarded is APRN, BC (Advanced Practice Registered Nurse, Board Certified)

ANCC Testing Fees

ANA Members.....	\$270
American College of Nurse Practitioners member	\$340
Non-member.....	\$390

For more information see <http://www.nursecredentialing.org/certification.aspx>

Graduate Clinical Placement Plan

Student _____ Academic Year _____

Course	Preceptor	Agency	Vita on file with MSU
NRSG 525 Family Mental Health Nursing I			
NRSG 526 Family Mental Health Nursing II			
NRSG 527 Family Mental Health Nursing III			
NRSG 528 Family Mental Health Nursing IV			

Clinical Faculty Reference Guide

Clinical Faculty Responsibilities

- Meet with students to discuss clinical site selection.
- Meet with students at least twice monthly for NRS 525 & NRS 526 and at least once monthly for NRS 527 and NRS 528 to review notes, discuss clinical and role issues.
- Maintain monthly contact with preceptor
- ½ day site visit (or more if needed)
- ___ Track student's clinical hours – signed by preceptor **AND** clinical faculty
- ___ Complete Clinical Faculty Evaluation of Student (Satisfactory/Unsatisfactory)
- ___ Receipt of ALL paperwork from student (see student's list)
- ___ Preceptor Evaluation (evaluation of preceptor at end of semester)

Student Responsibilities

1. Preceptor packet is sent directly to student to take or send to preceptor.
2. Student to see that the Agency Agreement and preceptor vita has been returned to FPMHNP Clinical Coordinator BEFORE starting clinical.
3. Student to monitor clinical hours
4. Student to return ALL paperwork to clinical faculty at end of the clinical experience.
Paperwork to include:
 - ___ Log and/or SOAP notes as required by course instructor
 - ___ Clinical Hours Record – must be signed by preceptor AND clinical supervisor
 - ___ Clinical calendar (optional)
 - ___ Preceptor Evaluation of Student
 - ___ Preceptor Evaluation Tool (evaluation of preceptor)
 - ___ Copy of preceptor "thank you" letter sent by student

FYI -- Preceptor Packet contains:

- Cover letter introducing student and clinical faculty; preceptor responsibilities; duration of course and required clinical hours
- Student evaluation form
- Clinical faculty responsibilities
- Agency Agreement (if applicable)
- Vita short form & MSU employment information (for affiliate appointment, if desired)
- Specific course description
- Self addressed, stamped return envelope

Graduate Program forms available online at <http://www.montana.edu/wwwnu/student/graduate.php>

MONTANA STATE UNIVERSITY – BOZEMAN
College of Nursing
Clinical Nursing Course
Confidentiality Agreement (HIPPA)

Students enrolled in the College of Nursing recognize the importance of protection of confidential information about patients and their families and of the operations of agencies where students are placed for clinical experiences. It is the obligation of every student to protect and maintain this confidentiality. All patient information stored via paper or computer system is considered confidential. It is the ethical and legal responsibility of all students to maintain and comply with all confidentiality requirements of the agencies used for clinical experiences.

As a student at Montana State UniversityB Bozeman College of Nursing, I agree to the following:

1. I will protect the confidentiality of all patient, family and clinical agency information.
2. I will not release unauthorized information to any source.
3. I will not access or attempt to access information other than that information which I have authorized access to and need to know in order to complete my assignment as a student.
4. I will report breaches of this confidentiality agreement by others to my clinical instructor and/or the course coordinator of NRSG _____. I understand that failure to report breaches is an ethical violation and subjects me to disciplinary action.
5. I will not put patient/family/clinical agency identifying information on any written work completed for any assignment.
6. I will not put patient/family/clinical agency identifying information on any stored information (disk or hard drive) on my own personal computer or on any other public or private computer.

Date

Signature

Print Name

This form will be placed in my academic file; I was given a copy of this agreement for my records.
