Interdisciplinary Integration: Learning, Discovery and Engagement

**Goal**
“To empower students and faculty to improve the world, by integrating learning, discovery and engagement in an interdisciplinary context.”

**Measurable Outcomes**
1) The number of students participating in experiential learning will increase. These include:
   * curricular capstone research, community-based research, interdisciplinary seminars
   * co-curricular internships, study abroad, global or domestic service learning
   * extra-curricular outreach, engagement
2) The number of interdisciplinary faculty publications will increase.
3) The number of interdisciplinary seminars will increase.
4) The number of interdisciplinary faculty hires will increase.
5) Results on the senior survey, NSSE and the VSA will demonstrate the impact of higher quality learning on students. Capstone projects and e-portfolios could also serve as evidence of such learning.
