Integration

**Goal**

By integrating learning, discovery and engagement, and by working across disciplines, MSU will help students, faculty staff and communities improve the world.

**Measurable Outcomes**

- MSU will promote a highly productive research, creativity, discovery and innovation enterprise to enhance student learning, expand the economies of Montana and the world and advance the frontiers of knowledge and the arts. Upon graduation, all students will have a substantial curricular or co-curricular integrated learning, discovery and engagement experience, by 2019.

- The number of faculty scholarly products with undergraduate and graduate students will increase 40% by 2015.

- The number of students completing double majors, internships, community-based research projects, minors, and certificates will increase 20% by 2017.

- To meet the grand challenges and complex problems of the 21st century, faculty and student work across disciplines will increase 40% by 2015, measured by scholarly products, curricular enhancements and faculty hires.

- Results on the senior survey, NSSE and the VSA will demonstrate the impact of higher quality learning on students. Capstone projects and e-portfolios will be evidence of such learning.
