Instructions

1. Decide which research lab you want to work in and contact the faculty member to verify that they have lab openings. Lab descriptions and contact information are available in the Psychology Advising Office (Traphagen 319) or online at montana.edu/psychology.
2. Have a topic or area of study in mind before approaching the instructor. Try to pick a topic that you are familiar with or interested in and that the faculty member is also interested in.
3. Discuss the proposed work with the instructor, and how many credits you want to earn. 3 credits = 9 hours of work per week. PSYX 490 may involve independent library research and a writing assignment in addition to laboratory research.
4. Discuss the objectives and expectations with the sponsoring faculty and adhere to all expectations outlined on this form.
5. Return the completed form either by email to psydept@montana.edu or in the Psychology Advising Office in Traphagen 319.
