Econ 305: Peer Leadership in Economics

Data Description Assignment

This assignment includes a **typed** description of the data you intend to use to examine your paper's hypothesis. You should explicitly state how the data is valid for testing your hypothesis, and also describe any shortcomings of the data.

 Submit the following:

   a. A general description of the data (source (government, your own survey, etc.), time period covered, geography covered, unit of observation, etc.)

   b. A table of the descriptive statistics for your data (variable names, units of measure, means, standard deviations)

   c. A scatter plot for your key relationship of interest.
