Project Empirical Results Assignment

For the topic you have chosen, submit 1-2 typewritten pages describing the empirical results from your test of your hypothesis.

The write-up should include:

1. A clear statement of the hypothesis, and the dependent and key independent variables of interest.
2. A table (or graph) showing your empirical results.
3. An interpretation of the empirical results as they relate to the hypothesis, existing literature, and empirical framework.
4. A description of any shortcomings or potential caveats that are important for correctly interpreting the empirical results.
