To reestablish your connection to the MSU-Secure wireless network, you will need to reconnect using your NetID as the Username:

1. Tap Settings
2. Tap Wi-Fi
3. In the list of Wi-Fi Networks, tap **MSU-Secure**
4. Tap the **Forget** button
5. From the list of Wi-Fi, again tap **MSU-Secure**
6. Enter your NetID in the Identity field and your password
7. Tap Connect

Your connection should be reestablished.
To update your Exchange account on an Android device:

1. Delete the existing account
2. Add a new account using your NetID as the username and the server settings as before.

For reference, see the instructions on Forge but don’t forget to enter your NetID as the username:
