Graduate Women in Science and Engineering Seminar Series Presents:

“STEM Outreach at MSU: What’s going on, why it’s good for your career, and how you can be part of it.”
by Suzi Taylor

Thursday, December 6th
11:30 - 12:30 pm
SUB Room 168

Refreshments starting at 11:15 am

As a land-grant institution, MSU holds a responsibility to share the impact of our work with people beyond the campus. But being involved in outreach is not just an obligation….it also brings relevancy to your studies, can contribute to your career, and makes you a happier person, too! Suzi Taylor of MSU's Academic Technology and Outreach and the Montana Girls STEM Collaborative will share examples of STEM outreach projects at MSU, who they have impacted, and how you can be involved. We’ll also brainstorm some ideas for future work and get your wheels turning on designing your own STEM outreach project.
