

# HKM ENGINEERING CONTINUES TO GROW WITH 50 YEARS OF PLANNING & ENGINEERING SERVICE IN MONTANA & WYOMING

HKM Engineering has been providing civil, structural, and environmental engineering services in Montana since 1955. Over the past 50 years, HKM has grown into a full-service engineering firm with offices in Billings, Bozeman, Butte, Great Falls, Helena, and Miles City, Montana as well as Sheridan and Lander, Wyoming. We also have certified materials testing labs in Billings, Bozeman, Sheridan, and Lander.

Broad services and capabilities, coupled with our strategic office locations promote in-house expertise on projects from early planning and environmental compliance, through final design and construction administration.

Through excellent client service we have demonstrated planning and engineering expertise on projects throughout the Rocky Mountain West, and continue to look for opportunities to raise the bar of excellence. Clients have become accustomed to high quality service, and we endeavor to extend this same service to all new clients. Our pride in our work is demonstrated through the dedication of individual employees and active participation in the communities in which we live and work.
