Windows 7 Post-Migration VPN Update

After your AD account has been migrated you will need to update the VPN domain settings. The easiest way to do this is to connect to your existing VPN connection and then updating settings as shown in these steps.

1. Click your existing Montana State VPN connection.  
   *The window below will be displayed.*
2. Enter MSU in the Domain field.
3. Click **OK**. Your settings will be saved.
