

SPATIO-TEMPORAL VARIABILITY IN CLIMATE DRIVES PATTERNS OF VULNERABILITY AND RESILIENCE IN WESTERN US FORESTS

Dr. Solomon Dobrowski

UNIVERSITY OF MONTANA

Thursday, November 1 at 3:30pm

Lewis Hall 304

Solomon is a landscape ecologist in the Department of Forest Management in the Franke College of Forestry and Conservation at the University of Montana.

His research focuses on conservation biogeography and global change science with a focus on western North American forests. He received a PhD and Masters degree from UC Davis and has fond memories of his days as a Cal Forester.
