

An aerial photograph of a large, clear lake. The water is a deep blue-green color, and the bottom is visible, showing dark rocks and some green algae. In the distance, a dense forest of evergreen trees covers the shoreline under a clear blue sky with a few small white clouds. In the lower right foreground, the red and black fins of a diver are visible, suggesting the lake is used for recreational activities.

Evaluation of Embryo Suppression Methods for Nonnative Lake Trout in Yellowstone Lake, Yellowstone National Park, WY, USA

M. S. Thesis Defense - Alex S. Poole
