THE CHILD ANXIETY, PHYSICAL HEALTH, AND EMOTION (CAPE) STUDY

Do you have a child between the ages of 7 and 10 years and ~2 hours of time? If so, we need your help and your family could earn $60!

Dr. Brandon Scott and the Children And Adolescent Anxiety Lab of Montana (CAALM) of the Psychology Department at Montana State University is conducting a study on child anxiety, physical health, and emotions (CAPE) in 7-10 year-olds. The study entails you and your child completing a set of questionnaires. In addition, your child will complete various tasks, while we measure their physiological responses, such as heart rate. If interested in participating in our study or have further questions, please contact us at (406) 994-2218.

Helping Montana Youth One Heart Beat at a Time!
