

Cell Biology and Neuroscience Seminar

Thursday, April 19th

1:10 pm – 2:00 pm

108 Plant Bioscience Building

Dr. Kaspar Podgorski

Janelia Fellow

Howard Hughes Medical Institute

Janelia Research Campus

“Frontiers in imaging brain activity”

Dr. Podgorski will introduce some history of the microscope in neuroscience, then discuss how modern computer science, physics, and molecular biology are being brought together to make new tools to study how brain circuits process information.
