

## Civil Engineering Intern

The Civil Engineering Intern will be responsible for the preparation of civil engineering and land survey plans, maps and exhibits. The intern will utilize CAD software and work closely with licensed Civil Engineers and Land Surveyors to prepare a wide variety of work product including construction plans for water, sanitary sewer, and storm drainage piping systems, roadway plans, site plans and grading plans, topography maps, plat maps and certificates of survey for residential and commercial projects. The intern will also gain first-hand experience through construction inspection, and at times, assisting with the construction layout and land surveying of ongoing projects. Candidates for this position shall have, at a minimum, attended an accredited college in a civil engineering, or land surveying curriculum. The person in this position is expected to exercise a strong work ethic, organizational skills and demonstrate proficiency with drafting fundamentals and be able to quickly learn and apply new drafting skills. It is expected of all employees that they work well with others, absorb and apply constructive criticism and seek guidance from more experienced members of the team as necessary.

## About Alpine Surveying & Engineering Inc
