

STAFF/PROJECT ENGINEER/SCIENTIST

Bison Engineering, Inc., is a Montana-based, employee-owned environmental engineering firm with 41 years of experience in helping our clients comply with air quality and environmental regulations. We specialize in air quality permitting, emissions testing, ambient air monitoring, and gas flow monitor design and manufacture. We are recruiting for a staff or project engineer/scientist for our Consulting Services Department.

We will consider applicants with a four-year engineering or other technical degree. A minimum of two to five years of environmental experience in industrial, regulatory, and/or consulting settings are required. Applicants should have background or interest in learning stationary source air quality regulations. Technical requirements for the position include the ability to learn and interpret environmental regulations, to use compliance management tools, and to manage client relationships. Applicants should possess strong written and verbal communication skills as well as the ability to work independently and on teams.

Bison offers a competitive salary and a full benefits package including a 401k retirement plan. Please send resume and letter of interest to:
