

DOWL is hiring an entry level Civil/Environmental Engineer in Water Supply and Wastewater Sub-practice Area in Bozeman.

This person would immediately start working on projects close to home in the municipal water supply and wastewater infrastructure market, including a project developing and investigating locations for new potable water wells and the associated treatment for the City of Belgrade; a Wastewater Treatment Plant Master plan project in Sheridan, WY; and a sanitary sewer slip-lining project in Bozeman.

In the future, projects may include Industrial (mining, manufacturing) water treatment process engineering services, arctic utility design, and much more.

Basic Autocad experience, a knowledge of Water and Wastewater Treatment Unit Operations, and experience sizing hydraulic systems (pumps, valves, pipes, open channel) would be desirable. In addition to Civil/Environmental students, mechanical and chemical engineering students interested in the WS&WW field are welcome to apply as well.

If interested, please email [gplatt@dowl.com](mailto:gplatt@dowl.com) or call at 907-854-9373.
