# Cisco AnyConnect VPN Client for Windows

Follow the instructions below to download, install and connect the AnyConnect Secure Mobility Client on your Windows computer to the VPN.

## Instructions

For Software Download go to the following [link](#) below:

1. Go to <https://www.montana.edu/software>.  
*Locate Cisco AnyConnect (VPN Client) section at top of page.*
2. Click the **box** next to “I accept Software Terms of Use”.
3. Click the link for the **Windows AnyConnect Secure Mobility Client (4.4)**.

Cisco AnyConnect (VPN Client)		
<a href="#">For Cisco AnyConnect software installation instructions</a>		
<input type="checkbox"/> I accept <a href="#">Software Terms of Use</a>		
Operating System	Download	Size
 Mac OS X	<a href="#">AnyConnect Secure Mobility Client (4.4)</a>	6M
 Linux 64-bit	<a href="#">AnyConnect Secure Mobility Client (4.4)</a>	5M
 Windows	<a href="#">AnyConnect Secure Mobility Client (4.4)</a>	5M

*The installer file will download.*

## Install:

1. Click **Save**, when asked: *What do you want to do with anyconnect-win-4.4.03034-...?*
2. Click **Run**.  
*The Setup Wizard opens.*
3. Follow prompts to install.
4. Click **Yes**, when prompted with *Do you want to allow this app...?*
5. Click **Finish** when installation has completed.

## Connect:

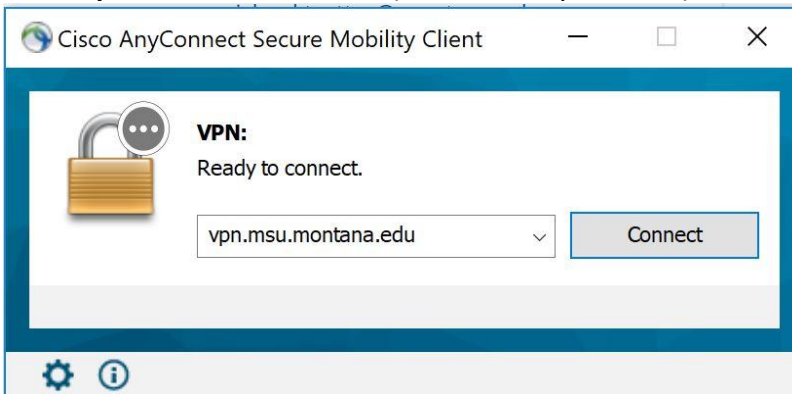

1. Open **Cisco AnyConnect Secure Mobility Client**.

The app can be found by clicking the small white up arrow in desktop tray and then clicking Cisco AnyConnect globe-icon.

*The Ready to Connect VPN dialog box opens.*

2. Enter **vpn.msu.montana.edu** (if not already entered) and click .

*A login window opens (see image below).*

3. Log in:
  - a. Choose **Group** appropriate to your role at MSU (in most cases this will be **MSU-Employee-VPN** or **MSU-Student-VPN**)
  - b. Enter your **NetID** and **NetID Password**.
  - c. Click **OK**.

You will now be connected to the MSU VPN. The Cisco icon in the desktop tray, found by clicking the small white up arrow, will now have a little padlock on it showing the computer is connected.

**Disconnect:**

Right-click on the icon and select **Disconnect**.

**To connect in the future:**

Go to your desktop tray, click the white up arrow ^, and click the round Cisco icon. When the app opens click the Connect button just as you did in step 2 above, and you'll be connected.

**NOTE:** You will not connect by going to your networks as you had in the past when connecting to the old VPN. Always connect using the AnyConnect app as outlined above.
