Mapping a Share Drive in Windows 10

- 1. Search in Start for "This PC", click "Open"
- 2. This PC will open, click "Computer" at the top, then "Map Network Drive"
- 3. Leave the "Drive" box alone, in the "Folder" box, type..... \\bridger

Drive:	Z: ~		
Folder:	\\bridger	~	Browse
	Example: \\server\share		
	Reconnect at sign-in		
	Connect using different credentials		

- a.
 b. Should look like this, leave the check mark and empty box alone. Click "Browse"
- 4. You'll see the Bridger drive show up, from there you can click the arrow to expand. I would select the "Shared" folder, then hit "OK"

	💣 Network
	🗸 💻 bridger
	🗸 🚽 Files
	> 📊 Cerberus
	> 🛃 ICAL
	> 📊 Labs
	🗸 🔚 Shared
	🗸 📙 IT
a.	> 📙 Documentat

- b. Will look similar to this, just different folders since we have different access.
- 5. Finally "Map Network Drive" should look like below and you can then hit "Finish"

Drive:	Z: ~		
Folder:	\\bridger\Files\Shared	~	Browse
	Example: \\server\share		
	Reconnect at sign-in		
	Connect using different credentials		

a.
