Federal Real Estate Spending Smart Growth America | READ STORY

This study by Smart Growth America claims that federal government spending in the real estate market has a significant impact on the location and nature of real estate development. Federal government spending in real estate amounts to approximately \$450 billion a year, and Smart Growth America argues that the positive impact leveraged by this investment is distributed unevenly, such that many of the communities most in need of help remain unassisted by the spending.

President's Corner

The Montana State
University Local Government
Center is pleased to
announce release of the
latest issue of the Montana
Policy Review titled
"Community Responses to
Energy Development." The
upcoming webinar schedule
will be announced
soon; previous
issues and archived
webinars are also available.

In related news, the Local
Government Extension
Training (LGET) group
recently hosted a webinar
titled "The Missouri County
Budget Trend Analysis
System" by Dr. Judy
Stallmann. All archives are
posted on the LGET archived
webinar page.

As a final reminder, the 2013 Community Development
Society Conference will be held July 20-24, 2013 in Charleston, South Carolina, USA. The Call for

Libraries Today Pew Internet | READ STORY

In a new survey of Americans' attitudes and expectations for public libraries, the Pew Research Center's Internet & American Life Project finds that many library patrons are eager to see libraries' digital services expand, yet also feel that print books remain important in the digital age. Fully 91% of Americans ages 16 and older say public libraries are important to their communities; and 76% say libraries are important to them and their families.

How important are libraries?

Among all Americans ages 16+, the percentage who say that libraries are "very important," "important," "not too important," or "not important at all" to them and their families, and to their community as a whole

■ Very important ■ Somewhat important ■ Not too important ■ Not important at all

Source: Pew Research Center's Internet & American Life Library Services Survey of 2,252 people age 16 and older conducted October 15-November 10, 2012. The survey was conducted in English and Spanish and on landline and cell phones.

Rural Household Income

Daily Yonder | READ STORY

The national median for U.S. household income in 2011 was \$50,502. The median household income of less than 400 rural and exurban counties exceeded the national figure. This succinct report by the Daily Yonder encapsulates the income standing of rural and exurban counties, showing that, while a few of these counties rank well above the national median, there remains a strong disparity between rural and urban income.

Abstracts provides all the details; the deadline is Feb. 15, 2013.

Risk Factors and Cause of Death IHME | READ STORY

This interactive tool, included among other, similar tools by the Institute for Health Metrics and Evaluation, presents the highest ranking worldwide risk factors and causes of death. The visualization shows the change in rank between 1990 and 2010. High blood pressure, smoking, and alcohol use now rank as the highest risk factors, while heart disease, respiratory infections, and stroke rank as the most common causes of death.

1990 Mean r	ank (95% UI)	2010 Mean rank (95% U))	% Change (95% UI)
1.0 (1-2)	1 Lower respiratory infections	1 Ischemic heart disease	1.0 (1-2)	34% (24 to 41)
2.0 (1-2)	2 Diarrheal diseases	2 Lower respiratory infections	2.2 (2-4)	-43% (-49 to -36)
3.4 (3-5)	3 Preterm birth complications	3 Stroke	3.7 (2-6)	28% (11 to 38)
3.7 (3-5)	4 Ischemic heart disease	4 Road injury	3.9 (2-8)	36% (9 to 74)
6.0 (5-8)	5 Stroke	5 Diarrheal diseases	6.8 (4-10)	-51% (-60 to -43)
6.6 (5-9)	6 COPD	6 Malaria	7.4 (2-12)	25% (-16 to 84)
7.2 (5-11)	7 Road injury	7 HIV/AIDS	7.5 (5-10)	316% (259 to 370)
9.2 (5-12)	8 Tuberculosis	8 Low back pain	7.5 (3-12)	45% (32 to 59)
9.6 (5-14)	9 Malaria	9 Preterm birth complications	7.6 (4-11)	-28% (-42 to -13)
9.7 (5-13)	10 Neonatal encephalopathy	10 COPD	7.8 (5-10)	2% (-7 to 12)
11.9 (9-15)	11 Protein-energy malnutrition	11 Tuberculosis	11.7 (10-16)	-14% (-33 to 5)
12.3 (8-16)	12 Low back pain	12 Neonatal encephalopathy	12.4 (10-18)	-17% (-34 to 4)
12.8 (7-15)	13 Congenital anomalies	13 Self-harm	15.7 (11-23)	32% (5 to 51)
14.4 (6-27)	14 Neonatal sepsis	14 Neonatal sepsis	15.8 (7-28)	-4% (-35 to 32)
16.2 (3-37)	15 Measles	15 Diabetes	16.3 (13-21)	77% (63 to 87)
16.8 (13-23)	16 Iron-deficiency anemia	16 Major depressive disorder	16.4 (12-23)	37% (21 to 55)
16.9 (14-20)	17 Meningitis	17 Lung cancer	16.6 (12-24)	32% (18 to 42)
18.1 (15-25)	18 Drowning	18 Falls	17.5 (13-22)	42% (18 to 67)
19.4 (15-25)	19 Self-harm	19 Cirrhosis	18.3 (14-23)	33% (23 to 44)
20.3 (15-26)	20 Lung cancer	20 Congenital anomalies	19.4 (14-25)	-29% (-46 to 3)
20.6 (16-26)	21 Major depressive disorder	21 Interpersonal violence	20.2 (13-25)	32% (20 to 51)
21.9 (18-26)	22 Cirrhosis	22 Iron-deficiency anemia	20.5 (13-27)	-7% (-10 to -4)
22.7 (18-26)	23 Falls	23 Protein-energy malnutrition	22.6 (17-27)	-43% (-55 to -28)
23.1 (17-30)	24 Interpersonal violence	24 Meningitis	24.1 (21-28)	-20% (-34 to -4)
25.8 (22-30)	25 Diabetes	25 Drowning	26.9 (21-31)	-26% (-38 to 16)
29.9 (25-35)	29 HIV/AIDS	36 Measles	57.3 (29-96)	-80% (-86 to -73)

Election Results 2012

Robert J. Vanderbei | READ STORY

Robert J. Vanderbei of Princeton University provides a series of figures demonstrating county by county results in the 2012 presidential election. In addition to providing an overview of the election results, the maps demonstrate the complex relationship between urban and rural voter influence, drawing attention (like the <u>cartograms</u> of Mark Newman) to the significance of population distribution in determining election results.
