

# Lessons for Trump from a Free Market Environmentalism

A presentation

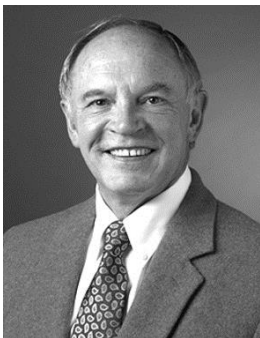

Terry L. Anderson

William A. Dunn Distinguished Senior Fellow, PERC  
John & Jean DeNault Senior Fellow, Hoover Institute

**Montana State University • Linfield Hall 125**

**March 1, 2017, 6:30-8:30 pm**

Free Market Environmentalism uses the incentives of the marketplace to make the environment an asset rather than a liability. Using the basic tenets of free market environmentalism, Terry Anderson will outline some win-win policies that the Trump administration could make happen.

Terry Anderson's research helped launch the idea of free market environmentalism and has prompted public debate over the proper role of government in managing natural resources. He is the author or editor of thirty-seven books. Among these is Free Market Environmentalism, co-authored with Donald Leal, and winner of the 1992 Sir Antony Fisher International Memorial Award.
