Volunteer to assist field ornithologist

This volunteer opportunity is a great way for a wildlife biology, environmental sciences, or ecology major to add some valuable experience to your resume. You do not need expertise—you will be with an expert birder.

Tasks:
Assist expert field ornithologist in conducting songbird point counts in the select riparian areas of the northern range of Yellowstone National Park. Point counts record the presence of breeding pairs of songbirds by visual and auditory identification. We need one or two volunteers to work one or two days per week between June 10th and July 10th. There may be additional opportunities in July and August.

Qualifications:
- Avid hiker for short distances
- Knowledge of outdoor safety and wilderness first aid
- Reliable and self-motivated
- Interested in birds

We will reimburse gasoline costs and pay a per diem for food and supplies. Please contact Melissa Todd at the Yellowstone Ecological Research Center at: howie@yellowstoneresearch.org
