

Seasonal Rangeland Technician Job Posting

Are you looking for an opportunity to increase your plant identification skills, earn some money, get college credit, and spend time outdoors this summer? Our company, Grouse Mountain Environmental Consultants, is seeking multiple Seasonal Rangeland Technicians with experience in plant identification and rangeland sampling methodologies based out of our Buffalo, WY, office. Technicians will be completing rangeland assessments in accordance with the BLM's Assessment, Inventory, and Monitoring (AIM) protocol, and other vegetation measurement processes. The position will start in May and continue into early September (dates flexible). We are also able to work with you and your professors so that you can earn course credits for this internship. Hired interns will be provided with free housing.

Overview of Essential Duties and Responsibilities

- Travel to and sample rangeland sites throughout the state of Wyoming
- Navigate to rangeland sites using a GPS and a 4-wheel vehicle to collect accurate field data
- Read and record line point intercept transects
- Collect vegetative forage production data by clipping

Qualifications

- Proficient in reading maps
- Skilled in operating UTVs
- Willingness to travel and camp overnight across Wyoming
- Ability to lift over 30lbs
- Ability to hike difficult terrain in variable weather conditions
- Assessment, Inventory, and Monitoring (AIM) training a plus, **but not required**
- Interpreting Indicators of Rangeland Health training a plus, **but not required**

Interested candidates should email their resume to Kylen Holt at kholt@gmecwy.com. Please contact Kylen with additional questions regarding this position at 307-684-2112.
