

# Student Research Experience: Undergraduate Research Assistant for the 2021-2022 Academic Year

*The Thum Lab is seeking an undergraduate research assistant for laboratory work on the genetics of invasive plants. Motivated candidates will also have the opportunity to gain valuable research experience by leading an independent project in evolutionary ecology aimed at guiding decision making in invasive species management.*

Evolution and  
ecology of invasive  
species

Molecular ecology

Solutions to the  
pressing and  
complex problems  
of invasive species

## HOW TO APPLY:

Email a resume and any questions to [katie.gannon@student.montana.edu](mailto:katie.gannon@student.montana.edu).
