July 8, 2017

Dear Canola Crop Inspector,

I was recently made aware of an opening in your hybrid canola field internship program. I became interested in the internship and the work Bayer is doing after meeting one of your interns and learning about his experience. I have been immersed in agriculture my whole life, having grown up a fourth-generation grain farmer in north central Montana. I am confident my work ethic, grain production experience, weed identification knowledge, social skills, and problem-solving ability will be assets to your canola production certification program.

Next week I will be attending the Teton County 4-H camp as a Camp Counselor. While at camp, I will teach a workshop on macramé, organize the opening ceremony, and lead evening games and activities. As an experienced member of the counselor team, I bring a positive attitude to camp assignments and am a mentor to both the younger counselors and the campers.

I feel qualified for your field internship due to my extensive agricultural involvement and ability to work well with others. Thank you for reviewing my resume and job application. I will return from camp on July 20 and will then be available to visit with you about how I can contribute to Bayer through the internship.

Sincerely,

Clover Bud
