

## Record of Excluded Select Agent Toxin Use and Disposal

- ❓ Please use one form for each toxin purchase or acquisition.
- ❓ Keep this record for a minimum of three years after all of the toxin on this form has been destroyed.

Select Agent toxins are not required to register with the Federal Government if the amount under the control of a Principal Investigator does not exceed at any time the permissible toxin amounts, which are indicated below in parentheses. Principle Investigators that possess a Select Agent toxin equal to or under the permissible amount must maintain an inventory of the amount of the Select Agent toxin present in the laboratory at any given time. This inventory should document the number of vials containing toxin, amount in each, amount remaining (if applicable) after each use, and how the toxin was inactivated when no longer needed for experiments. You must also have a current IBC approval number and the appropriate training to possess any of the following [Select Agent Toxins](#) in any quantity:

PERMISSIBLE TOXIN AMOUNTS

HHS Toxins [§73.3(d)(7)]	Amount
Abrin	1000 mg
Botulinum neurotoxins	1 mg
Short, paralytic alpha conotoxins	100 mg
