**Subject:** BioRAFT - Chemical Inventory Program

Office of the Provost

Dear MSU Faculty and Staff,

To ensure safety and compliance of all faculty, students and staff, we are requesting that each laboratory complete and maintain a chemical inventory in Bioraft by the start of the fall 2021 semester.

Safety & Risk Management (SRM) maintains a chemical inventory through a third-party inventory system called BioRAFT. This chemical inventory is used to maintain compliance with federal, state, and local regulations and to assist emergency personnel in the event of an accident or incident. In addition, the chemical inventory may be used to develop laboratory specific SOPs and procedures assisting with safety and compliance.

Instructions on how to use and navigate Bioraft can be found here: <https://www.montana.edu/srm/bioraft/bioraftchemtracker.html>

Please contact Ryan Brickman @ [ryan.brickman@montana.edu](mailto:ryan.brickman@montana.edu) if you have any questions or require assistance regarding implementation.

We appreciate your support and contribution in maintaining a safe and compliant learning environment and workplace at MSU. Thank you and have a great day!
