Frogs (Xenopus, Leopard)	0.60	0.62	0.65	1.00	tank/day

1. Animals are housed in autoclaved and ventilated caging, provided irradiated feed and sterile water and cage changes are performed within a HEPA-filtered change station.

2. Animals are housed in the ABSL2 area of the ARC. They are maintained under 'specialized care' conditions. In addition, caging and personal protective equipment (PPE) are autoclaved upon exit.
